OBJECTIVE

I am highly dedicated with a strong passion for continuous learning and personal growth. My ability to communicate effectively and manage time efficiently ensures that projects are completed successfully and on schedule.

SKILLS

- **REACT JS**
- **REDUX**
- **NODE JS**
- **PRISMA SHEMA(ORM)**
- **POSTGRESQL**
- **CHROMA DB**
- **REST APIS**
- **CI/CD**
- **GIT**

EDUCATION

DHIRAJLAL GANDHI COLLEGE OF TECHNOLOGY
Bachelor of Engineering CGPA 8.11
2020-2024

JAYAM MATRIC HIGHER SECONDARY SCHOOL

HSC,Percentage-69, 2019-2020

GOVERNMENT HIGHER SECONDARY SCHOOL

SSLC,Percentage-71, 2017-2018

WORK SAMPLES

GitHub profile
https://github.com/Sathish-1234/

CERTIFICATION

- PROGRAMMING IN JAVA NPTEL-INDIA IIT -kharagpur
  SCORE-81%
- Html ,Css Testdome corporation
  SCORE-TOP25%
- Foundations of User Experience (UX) Design (Google Certification).
- Advanced React (Meta Certification)

ACHIEVEMENTS

First prize in project presentation in kongu college of Engineering and technology

Third price in project presentation in Muthayammal Engineering college

Participated in " Smart India Hackathon (2022)"

Got participatent certificate in project contest during engineer's day in Dhirajlal Gandhi College of Technology

INTERNSHIP

LUISANT SOFTWARE SOLUTIONS

APRIL 2023 – OCT 2023 (6 MONTHS) I developed a real-time restaurant application using ReactJS, ExpressJS, and MySQL. This project was my first real time application, and I successfully learned and applied these technologies concurrently, significantly enhancing my self-learning skills.

ZAUTO.AI

APRIL 2024 – JUNE 2024 (2 MONTHS), Worked on ai-driven web applications using reactjs, nestjs, postgresql, and prisma. Developed multi-tenant systems and integrated llms (large language models) to enhance functionality. Gained experience in full-stack development, api design, and database management.

PROJECTS

SEMISEARCH

Semisearch is a project utilizing the Language Model (LLM) module to transform unstructured data, such as PDF and image files containing large amounts of data, into structured data. When uploaded, the project processes these files to extract defined data elements, such as specific numbers, names, and other relevant information, making it easier to search and analyze the data efficiently.(cohere LLM module)

SHOPPINGSTO TENANT-BASED E-COMMERCE PLATFORM

I developed a multi-tenant e-commerce website using ReactJS, Redux, NestJS, and PostgreSQL. The project featured a scalable architecture where each tenant (vendor) has isolated data and customized experiences. Key functionalities included Google and Facebook login integration, email verification, and Jwt-based authentication for enhanced security.
Stack Used: FrontEnd : React js ,Redux, Ui framework(Bootstrap-5)
Backened: NestJs, Prisma , PostgreSQL.
URL :**shoppingsto.com**

JOB PORTAL INTEGRATION WITH ZOHO RECRUIT API

Developed and integrated the Zoho Recruit API into a job portal to streamline and automate the recruitment process. This integration allows seamless synchronization of job postings, candidate applications, and status updates between the portal and Zoho Recruit, enabling HR professionals to manage job listings and candidates efficiently from within the portal.
Stack Used: FrontEnd : React js ,Redux, Ui framework(Bootstrap-5)
Backened: NestJs, Prisma , PostgreSQL.
