OBJECTIVE

I am highly dedicated with a strong passion for continuous learning and personal growth. My ability to communicate effectively and manage time efficiently ensures that projects are completed successfully and on schedule.

SKILLS

- **PYTHON**
- **REACT JS**
- **UI & UX (FIGMA)**
- **GIT (VERSION CONTROLLER)**
- **PROJECT OWNERSHIP & TEAMWORK**
- **TIME MANAGEMENT**

EDUCATION

SRI SHANMUGHA COLLEGE OF ENGINEERING AND TECHNOLOGY
Bachelor of Engineering CGPA 7.9 CGPA 2020-2024

JAYAM MATRIC HIGHER SECONDARY SCHOOL

HSC,Percentage-**461**(76.83%), 2019-2020

JAYAM MATRIC HIGHER SECONDARY SCHOOL

SSLC,Percentage-**450** (90%), 2017-2018

WORK SAMPLES

GitHub profile
https://github.com/Hariprakash-2002

CERTIFICATION

- **Cloud Object Storage Certification (IBM)** Learned cloud storage architecture, data security, scalability, and efficient storage management.
- **Cybersecurity Certification** (Skillsda): Gained expertise in network security, threat detection, risk assessment, and ethical hacking.

ACHIEVEMENTS

First prize in project presentation in kongu college of Engineering and technology

Third price in project presentation in Muthayammal Engineering college

Participated in " Smart India Hackathon (2022)"

Got participatent certificate in project contest during engineer's day in Sri Shanmugha College of Engineering and Technology

INTERNSHIP

LUISANT SOFTWARE SOLUTIONS

APRIL 2023 – OCT 2023 (6 MONTHS) I developed a real-time restaurant application using ReactJS, ExpressJS, and MySQL. This project was my first real time application, and I successfully learned and applied these technologies concurrently, significantly enhancing my self-learning skills.

PROJECTS

SEMISEARCH

Semisearch is a project utilizing the Language Model (LLM) module to transform unstructured data, such as PDF and image files containing large amounts of data, into structured data. When uploaded, the project processes these files to extract defined data elements, such as specific numbers, names, and other relevant information, making it easier to search and analyze the data efficiently.(cohere LLM module)
Stack Used: FrontEnd : React js ,Redux, Ui framework(Bootstrap-5)
Backened: NestJs, Prisma , PostgreSQL.

TRAVEL-BASED APPLICATION FOR DISABLED INDIVIDUALS

I This mobile application is designed to assist disabled individuals in traveling independently by providing accessibility-focused features. It ensures ease of navigation, emergency support, and community interaction.
Tech Stack: React Native (Frontend), Node.js (Backend), MongoDB (Database)

FOOD WASTE MANAGEMENT SYSTEM (MERN STACK WEB APP)

The Food Waste Management System is a MERN stack web application that connects food donors, such as restaurants and grocery stores, with NGOs and individuals in need. It allows users to list surplus food with details like quantity and pickup time while using AI-powered image recognition to detect food nearing expiration and suggest donations. The platform features geo-based matching to connect donors with nearby NGOs, along with inventory management and volunteer coordination for efficient food redistribution.

AGRICULTURE MARKET CONNECTION SYSTEM

The Agriculture Market Connection System is a MERN stack web application that directly connects farmers with buyers, including retailers, wholesalers, and consumers, eliminating middlemen to ensure fair pricing. It allows farmers to list their produce, set prices, and negotiate deals in real time. The platform integrates live market pricing insights, direct chat for seamless transactions, and logistics support for smooth deliveries.
